SAIRA KHAN

Digital Health | Health Informatics & Interoperability | Systems Analysis | AI in Healthcare
Guelph, ON | 647-989-5426 | imamsaira@hotmail.com | saira-portfolio-nine.vercel.app

SUMMARY

Final-year Honours Digital Health student (Mohawk College, 2027) combining health informatics training with hands-on technology experience. At Min2Cloud, gathered client requirements, designed and documented technical solutions, built AI agents in Microsoft Copilot Studio, and wrote tested code in Agile sprints. Grounded in health interoperability standards (FHIR, HL7, DICOM), PHIPA/HIPAA privacy, patient safety, telehealth and clinical workflow redesign; led a student team digitizing a hospital's paper-based emergency surgery booking process. Brings eight years of client-facing experience in regulated Canadian banking, including training colleagues on new digital platforms, supporting change adoption and managing competing priorities.

SKILLS

Health Informatics & Interoperability: FHIR, HL7, DICOM/PACS, health information exchange, electronic health records (EHR) concepts, telehealth, virtual care, remote patient monitoring, health enterprise applications
Systems Analysis & Implementation: Requirements gathering, solution design, use cases, UML, system context models, clinical workflow redesign, technical documentation, end-user training
Development & Testing: Java, JavaScript, SQL, C#, HTML, CSS, React, Next.js, React Native, Git, unit and integration testing, code reviews
Privacy, Safety & Design: PHIPA, HIPAA, patient safety and risk management, TCPS 2 research ethics, user-centred design, Figma, UI/UX design
Data, Project & Change Management: Power BI, Tableau, statistics, data analysis, Jira, ServiceNow, Agile, Scrum, project planning, risk assessment, change management, stakeholder engagement
AI & Automation: Microsoft Copilot Studio, Microsoft 365 Copilot, AI agents, Microsoft Foundry, OpenAI, Claude

EDUCATION

Honours Bachelor of Digital Health | Mohawk College, Ontario **Expected 2027**
Relevant coursework: Health Architectures, Standards & Interoperability; Health Enterprise Application Development; Telehealth & Remote Patient Monitoring; Health Privacy Administration; Patient Safety & Risk Management; Software QA & Testing; Change Management

EXPERIENCE

Systems Analyst | Min2Cloud **May 2025 – Jul 2026**
Full-time summers; part-time during academic terms

- Gathered requirements in client meetings and translated them into technical specifications, solution designs and documentation for software projects.
- Built and configured AI agents in Microsoft Copilot Studio and applied Microsoft 365 Copilot to automate client business workflows.
- Wrote code with unit and integration test coverage; participated in testing cycles and defect resolution.
- Documented software architecture and components to support the development team and future maintenance.
- Delivered work in Agile/Scrum sprints with cross-functional teammates and regular peer code reviews.

DIGITAL HEALTH PROJECTS

Emergency OR Surgical Booking & Prioritization System | Brant hospital project **Student Team Lead**

- Led a student team redesigning a paper-based emergency surgical booking process that relied on pink surgical slips filled out by physicians and residents.
- Designed a digital booking and prioritization workflow and a shared dashboard giving nursing, diagnostic imaging and other departments visibility into case status, urgency and surgical priority.

Medication Adherence System | Mohawk College

- Designed a solution covering medication scheduling, reminders, adherence monitoring and healthcare-provider workflows.
- Produced the full analysis package: requirements, use cases, UML activity diagrams, system context model, project plan and risk assessment.

VitaMind – Student Mental Health Support App | Mohawk College
- Designed a Figma prototype for mood logging, trend tracking and access to support resources, including college-account sign-in and a trusted-contact alert.

EMS Location Finder | Mohawk College
- Built a React Native mobile app with an interactive map interface showing EMS stations and incident information using geolocation data.

ADDITIONAL EXPERIENCE

Financial Advisor | Royal Bank of Canada, Georgetown, ON **Apr 2019 – Dec 2021**
- Grew revenue 20% through client relationship management with personal and business clients; shared effective practices with fellow advisors.
- Led client meetings and trained colleagues on new products and digital platforms.

Financial Advisor | Scotiabank, Oakville & Guelph, ON **May 2017 – Apr 2019**
- Grew revenue 10% through cross-selling.
- Prepared client reports using analytical tools to support needs-based financial advice.

Banking, Accounting & Retail Roles | CIBC, Microline Inc., Jean Express **2008 – 2015**
- **CIBC:** Handled about 120 client calls per shift against a 60-call target.
- **Microline Inc.:** Automated invoicing and reduced costs 12%.
- **Jean Express:** Grew store revenue 18%.

CERTIFICATIONS

- TCPS 2: CORE-2022 Course on Research Ethics, Panel on Research Ethics (2026)
- UI/UX Design Certificate; Enterprise Design Thinking Practitioner and Co-Creator – IBM
- Financial Planning II (2023); Professional Financial Services Advisor, PFSA (2019); Canadian Securities Course, CSC (2015)
